BARRETT PINET ARCHITECTURE

## *Schematic Design, Development Application, Construction Certificate, Construction*

Alterations and additions to a federation bungalow, remodeling the rear of the house, improving the relationship to the garden and adding a new dual occupancy unit at the rear. The clients have a grown up child and wish to accommodate his and their own needs. The proposal focuses on the courtyard defined by the glazed rear of the refurbished old house and the new dual occupancy unit across the garden which has its own terrace. Living areas of both dwellings open onto the courtyard, with heavy planting used to achieve privacy.
