BARRETT PINET ARCHITECTURE

Design, Costruction Documentation, Construction (part)

As appointed architects to the owners corporation, Barrett Pinet Architecture has been retained for a number of years for works on this prestige apartment building. The works described on this page relate to refurbishment of the building's main entry lobby, upgrading outdated finishes, expanding its size, and incorporating a water feature at a later date. The water feature will bring some animation and acoustic character to the lobby, and delight with its combinations of render, stone, glass, lighting, and falling and still water.
